## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-8 and 12-13, drawn to a fluid movement system for moving a sample fluid, classified in class 422, subclass 100.
  - II. Claims 9-10, and 14, drawn to a method for moving a sample fluid, classified in class 436, subclass 180.
  - III. Claims 11-15, drawn to a software program, classified in class 700, subclass 266.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method does not require the specific structure of the apparatus. The method step of controlling the timing for releasing a pressure in the pressure variation means may be done by hand in which one activates or opens a manually operated valve. The method may be practices with a materially different apparatus or by hand.
- 3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

Application/Control Number: 09/911,125

Art Unit: 1743

shown to be separately usable. In the instant case, invention I has separate utility such as being manually operated without the use of a specific software application to test for a specific analyte in a sample. See MPEP § 806.05(d).

- 4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the method may be practiced manually without the use of a computer programmed to perform a specific application included within a software program. See MPEP § 806.05(d).
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 8. A telephone call was made to Paul D. Greeley on December 01, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control in Art Unit: 1743

requirement is being drafted.

Applicant was contacted numerous times afterwards for a response to the requirement. As a result to the non-response to the efforts of the examiner, a written

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian R. Gordon whose telephone number is (571) 272-1258. The examiner can normally be reached on M-F, with 2nd and 4th F off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
